

Target Website: scanme.nmap.org

VULNERABILITY ASSESSMENT REPORT

Prepared By: Teja Latha
Future Interns - Cyber Security Internship

EXECUTIVE SUMMARY OBJECTIVE

This report presents the results of a vulnerability assessment conducted on scanme.nmap.org using OWASP ZAP and Nmap. The assessment was performed to evaluate the security posture of the target system and identify potential vulnerabilities that could be exploited by malicious actors.

The objective was to identify potential security issues, classify risks based on severity levels, and provide actionable remediation recommendations to improve the overall security of the target website.

METHODOLOGY

NMAP

OWASP ZAP

BROWSER DEVELOPER TOOLS

INFORMATION GATHERING

FINDINGS

MISSING SECURITY HEADERS - MEDIUM RISK

INFORMATION DISCLOSURE - LOW RISK

HTTP REDIRECTION OBSERVED - LOW RISK

ADDITIONAL ALERTS - TO BE UPDATED

SCREENSHOTS

This section contains visual evidence from the vulnerability assessment tools used during the scan. The screenshots document the Nmap network scan results and OWASP ZAP security scan findings including identified alerts.
